About APS Group

Founded in 2001, APS Group has built a strong reputation as a leading stock-holding supplier of premium aluminium and PVCu products for the construction sector. With a distribution network spanning Ireland, Great Britain, and beyond, we are trusted by professionals across the industry for our reliability, expertise, and service excellence.

Building on this success, APS is proud to introduce our Composite Product Division — offering high-performance decking, fencing, and cladding solutions to meet the evolving needs of modern outdoor construction. We provide a range of robust, low-maintenance, and visually striking composite products engineered for durability and long-term performance.

How APS Can Help You

Supporting Business Growth

APS goes beyond supply, offering technical expertise and dedicated account support to keep your projects running smoothly. Our commitment to trade support and brand development is what sets us apart. APS partners with merchants, contractors, and developers to deliver tailored solutions backed by in-depth technical knowledge, marketing assets, and responsive customer service.

Trusted Industry Partner

With over two decades of experience, APS has built strong relationships across the construction supply chain. Our comprehensive product portfolio, ISO 9001 and ISO 14001 certification, and FSB and Secured by Design accreditation make us a reliable partner for contractors, architects and developers alike.

Areas We Cover

Strategically based in County Antrim, our distribution network covers Ireland, Northern Ireland, England, Scotland, and Wales, ensuring consistent and efficient delivery to trade customers nationwide. With the scale, stockholding, and logistics capability to support projects of any size, APS is your trusted partner for modern, durable, and low-maintenance landscaping solutions.

Sustainability

As a business, our focus has always been on quality, efficiency, and sustainability. We supply composite decking, fencing, and cladding solutions that combine lasting performance with environmental responsibility. Manufactured using recycled or sustainable materials wherever possible, our products reduce waste and conserve resources, all while remaining robust and durable.

Key Benefits

- Manufactured using sustainable materials
- Long-lasting and low-maintenance performance
- Fully recyclable
- Certified to ISO 9001 (Quality) and ISO 14001 (Environmental Management)
- Supports compliance with modern sustainability standards

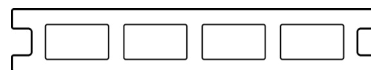

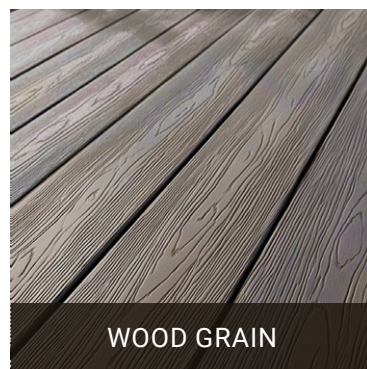

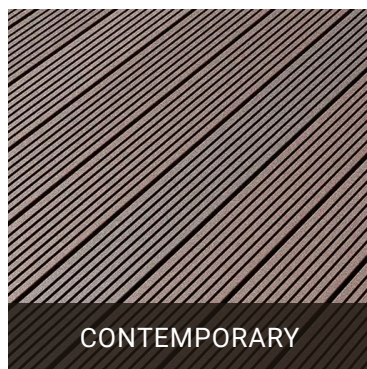

Learn More About
Our Commitment

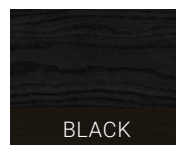

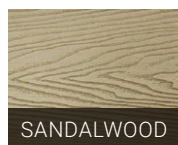

Classic Decking

APS classic decking offers a versatile, cost-effective solution for a wide range of construction and landscaping projects. Manufactured with a durable composite blend, these boards are resistant to rot, splintering and warping, giving long-term reliability without the need for regular maintenance associated with traditional wooden decking.

- Suitable for residential and commercial uses
- Slip-resistant and waterproof
- Ideal for gardens, marinas, swimming pools, walkways, and balconies

Length	3600mm
Width	146mm
Thickness	25mm

5 Stock Colours Available. 12 Made to Order.

Premium Decking

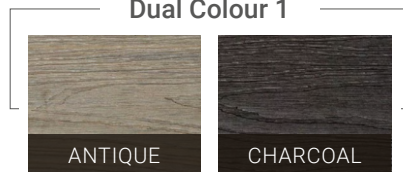

For projects that demand a high end finish, APS premium decking offers enhanced performance and a deluxe textured finish. With a refined profile and a wider colour selection, our premium decking offers a sleek wood grain look while maintaining the same robust, low-maintenance benefits as our classic decking.

- Higher-end boards with a sleek finish
- Slip- and scratch-resistant surface
- Fade-resistant for lasting colour
- Zero water absorption and low expansion rate
- Flexible design to suit modern builds
- Advanced co-extrusion technology

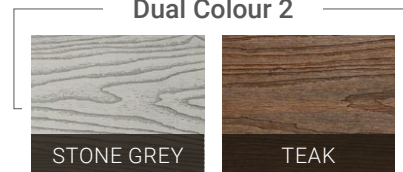

Length	3600mm
Width	138mm
Thickness	23mm

Balustrades

Our stylish balustrades are the perfect way to elevate an existing decking area or finish off a brand new APS composite deck. Available in black, grey and brown, they are designed for practicality and visual appeal, and feature a simple 'slot-together' design for quick and hassle-free installation.

Composite Fencing

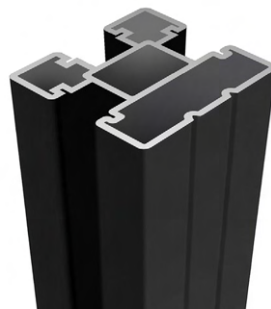

Our composite fencing provides a strong, reliable alternative to wooden fences, combining the natural look of timber with the low maintenance of our extruded composite material. Available with flat or slatted boards, and either composite or aluminium fence posts.

- Durable composite material
- Quick and simple modular installation
- Will not rot, warp or splinter like timber
- Low-maintenance with no repainting needed
- Modern, secure and weather-resistant finish

Trellis Screens

APS composite trellis screens offer a versatile solution for both indoor and outdoor applications, providing privacy, shade, or simply a decorative finish. Available in a choice of three designs, these durable panels can be installed with our timber or composite fencing, used as garden dividers, or wall-mounted for a striking feature.

Decorative Fence Tops

Crafted from durable composite materials and aluminium, these add-ons seamlessly integrate with existing fences, enhancing privacy while delivering an attractive finish. Their low-maintenance construction ensures they endure the elements with minimal upkeep, making them a reliable finishing touch that is sure to impress.

The Howard Kendall Suite

Premium Matchday Experience In The Heart Of Liverpool

Situated in the dynamic Liverpool Docklands and just a short walk from Everton FC's new stadium, the Howard Kendall Suite was conceived as a high-end hospitality venue designed to elevate the matchday experience for fans. With a bold architectural concept inspired by shipping containers, the suite merges industrial edge with a unique, VIP atmosphere.

From a fully stocked bar and first-class dining to tailored entertainment and private parking, the goal of the space was clear: create a venue that feels both connected to the spirit of the club and elevated in its execution – a venue worthy of the legends it celebrates.

To meet the high design and performance standards of the project, every material had to combine aesthetic impact, long-term durability, and low maintenance – particularly for the outdoor areas where form and function go hand in hand.

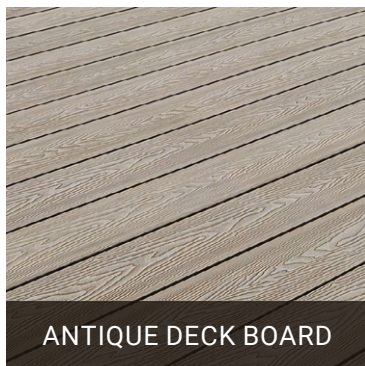

APS Group Contribution

APS Group was proud to support this standout development by supplying premium composite materials that aligned with the project's high-end vision and long-term performance needs. Collaborating closely with contractors and designers, our team provided technical guidance, material samples, and tailored logistics to help ensure a smooth build process.

With a reputation for reliability, product excellence, and trusted support, we continue to help clients across the UK and Ireland deliver ambitious, design-led outdoor projects with confidence.

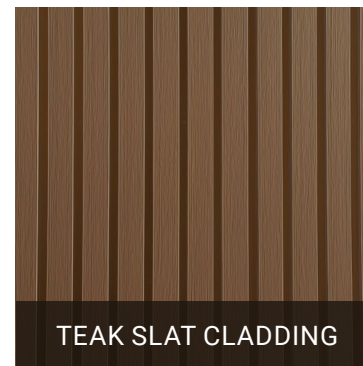

Featured Products

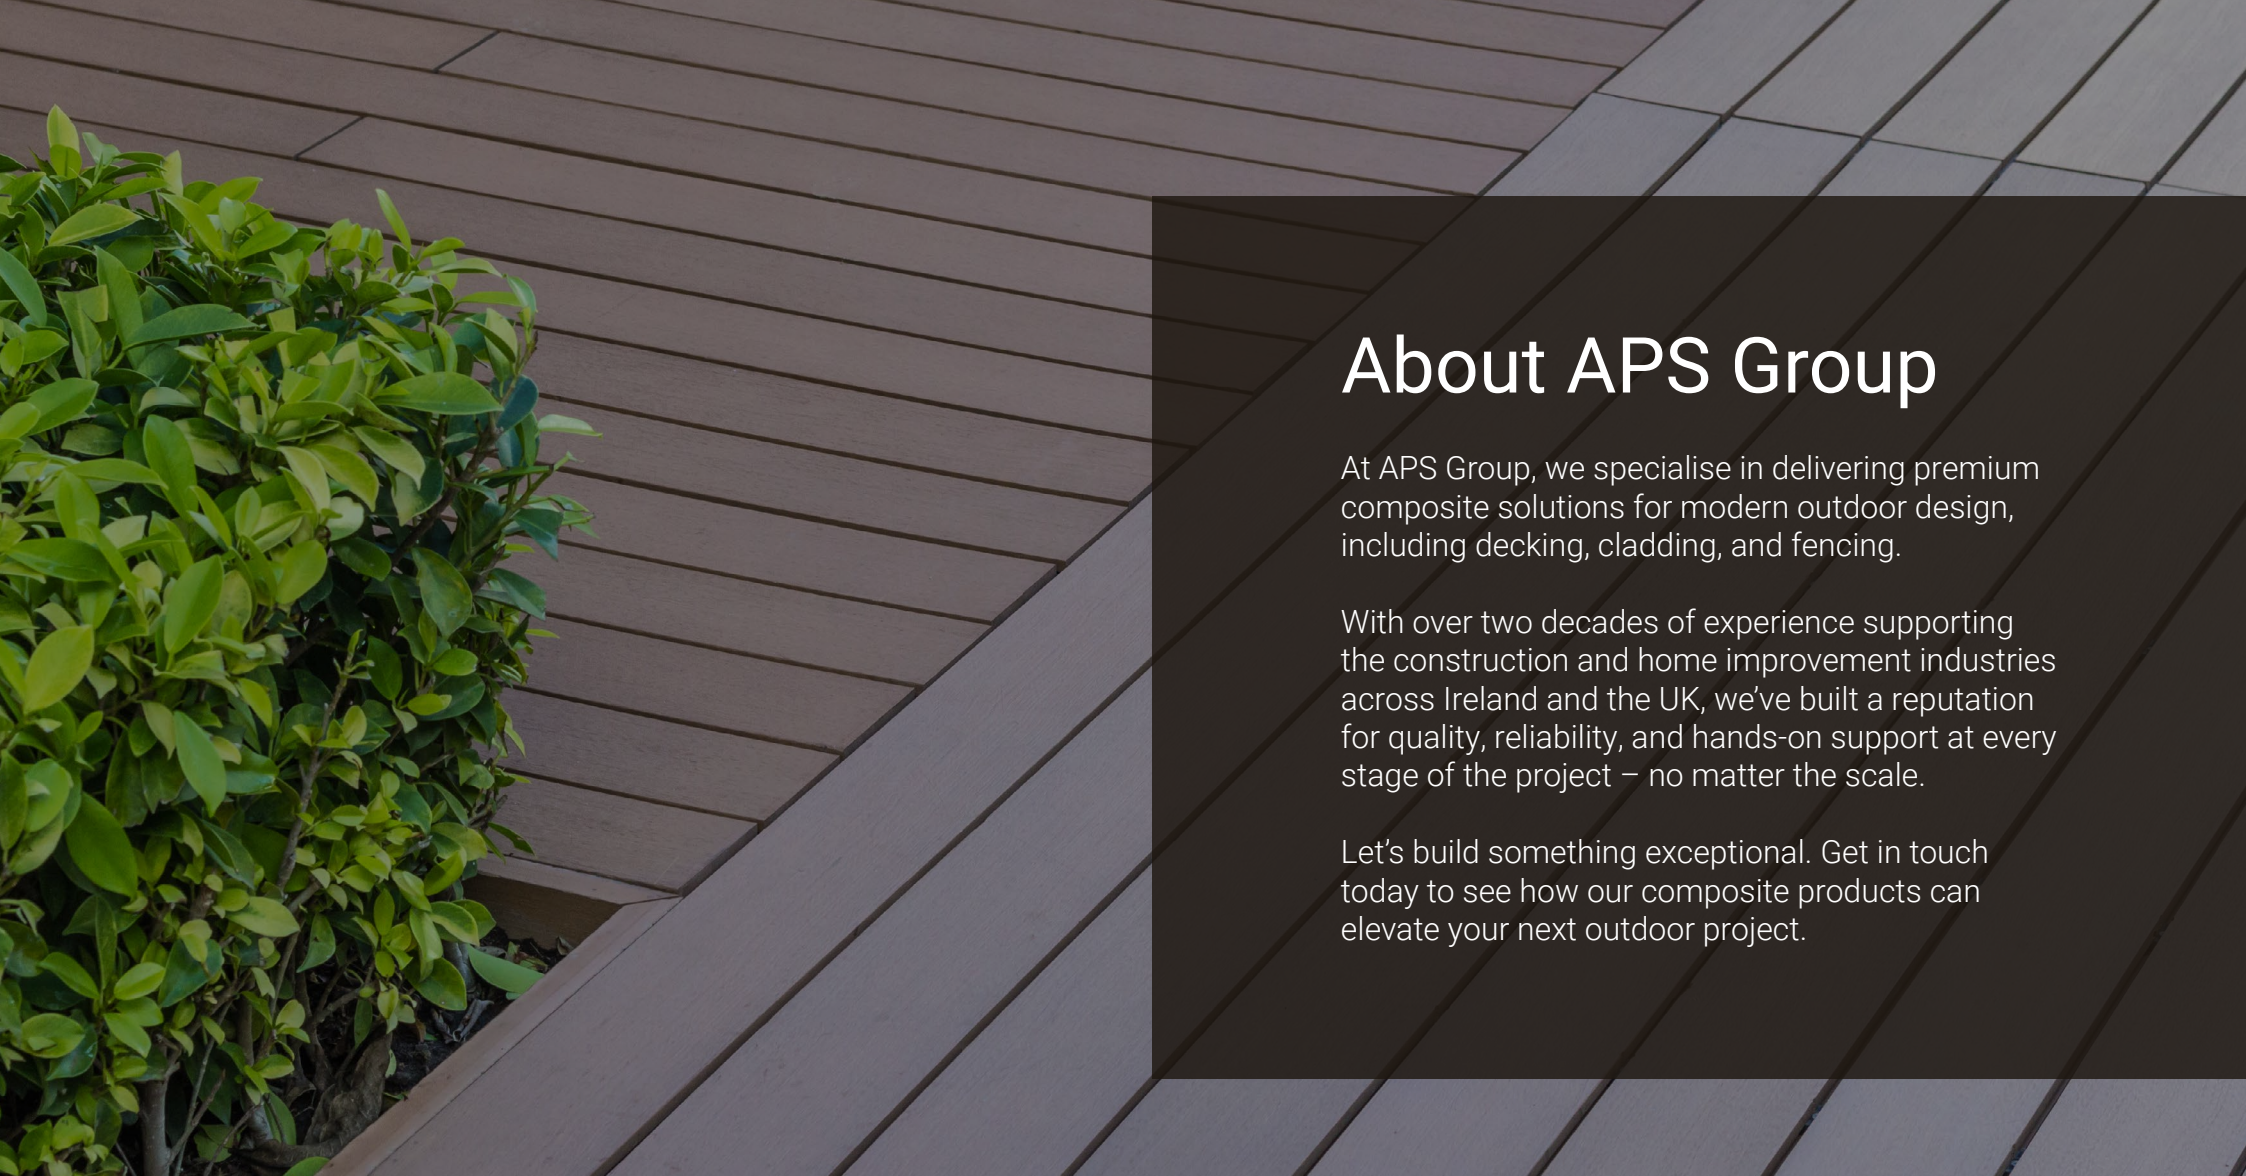

ANTIQUE DECK BOARD

Chosen for its rich tone and authentic woodgrain texture, our Composite Decking delivers the classic warmth of timber with none of the upkeep. Its slip-resistant surface, UV stability, and structural integrity make it ideal for high-traffic areas.

TEAK SLAT CLADDING

To elevate the character of the suite, our Slatted Cladding was specified for key external features. Its clean lines and warm tones provide a striking contrast to the industrial shipping container structure, softening the aesthetic while adding visual depth and texture.

About APS Group

At APS Group, we specialise in delivering premium composite solutions for modern outdoor design, including decking, cladding, and fencing.

With over two decades of experience supporting the construction and home improvement industries across Ireland and the UK, we've built a reputation for quality, reliability, and hands-on support at every stage of the project – no matter the scale.

Let's build something exceptional. Get in touch today to see how our composite products can elevate your next outdoor project.
